## Traceability for All

Peer Ledger was founded in 2016 with a vision of “*traceability for all*”. We use cutting edge blockchain technology to solve real problems related to manufacturing, environmental preservation, human rights and healthcare.

Our first product, **MIMOSI Connect**, makes supply chains transparent, responsive, and responsible when and where it matters. Our USPTO patented technology is [in production with PAMP SA](#), a renowned Swiss gold refinery.

MIMOSI Connect provides the flexibility to *track any material* and we proved this in a Government of Canada project to trace steel. Interoperability is critical to blockchain adoption, so we conducted two interoperability projects with Fortune 10 and Fortune 500 companies. These projects successfully utilized our robust API, web portal, and mobile app.

Peer Ledger believes in the power of blockchain and we strive to make our technology affordable to organizations of all sizes. We work with all points of a supply chain to provide a complete traceability solution. In December 2020, we onboarded a global company to enhance its responsible supply chain efforts in Asia. MIMOSI Connect is being piloted in a remote Asian jungle to reduce child labor risks and track a sensitive material from source to export.

## COVID-19: A new product for a new way of life

At the start of the pandemic we felt compelled to help businesses find trusted sources for personal protective equipment, so we offered MIMOSI Connect for PPE at no charge for six months.

As the crisis worsened, we launched **MIMOSI Health**, a digital health platform to streamline the testing, treatment, contact tracing and vaccination workflows. The platform eliminates handoff issues by tracking the chain of custody of COVID-19 tests and vaccines. MIMOSI Health unifies stakeholders from public health, hospitals and labs to provide consistent, real-time, actionable COVID-19 data.

MIMOSI Health and MIMOSI Connect are pre-qualified by the Government of Canada for pilots with federal agencies.

### 2020 AT A GLANCE

- *Launch of MIMOSI Health*
- *30x increased use of MIMOSI Connect's gold provenance graphs*
- *USPTO patent awarded*
- *Successful interoperability POCs*
- *Tracing Canadian steel*
- *Volta Ecosystem Impact Awardee*
- *OECD Panel & RMI Blockchain Interoperability workgroup*
- *\$5M sales pipeline*

## FOUNDER'S MESSAGE TO INVESTORS

2020 brought the most sales activity in Peer Ledger's history. The new EU regulations on conflict minerals and the FDA's food traceability rule have increased the demand for our products.

We have an active sales pipeline valued at over \$5 million and it's time to expand. In 2021, we are seeking to raise a \$10 million series A round. We are exploring investment in Canada, the US and EU.
