

Brands use MIMOSI for Responsible Supply Chain Management

Companies are working hard to ensure their products are free from conflict minerals. **But the biggest challenge remains obtaining complete and trusted traceability of minerals upstream to the mine.** This is where we can help.

Our patent-pending MIMOSI blockchain platform uses the power of a secure, digital, distributed ledger to:

Execute far better brand risk management

Verify the source and authenticity of materials at any stage in the supply chain with immutable records

Perform fast, detailed audits of transactions, saving costs

Detect and prevent counterfeit materials and products

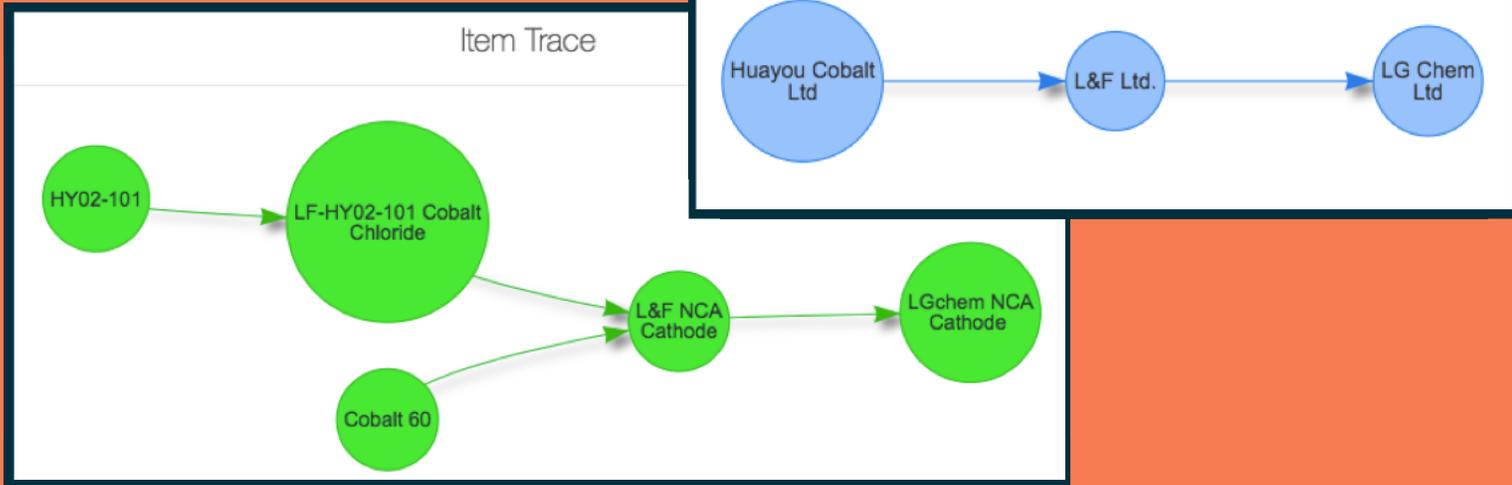

Verify compliance with responsible sourcing policies and regulations

Peer Ledger

Caring | Transformative | Trusted

MIMOSI's easy view traceability and compliance

MIMOSI helps companies

Reduce Risk

Extend risk management beyond Tier 1 suppliers, significantly improving traceability.

Save Costs

Reduce auditing costs by 50-70% with easy access to transaction documents, and significantly reduce risk management costs.

Strengthen Reporting and Compliance

Access reports with consolidated data from all suppliers on MIMOSI. Know, at a glance, the percentage of 3TGs in your value chain and the percentage of suppliers compliant with policies.

Deliver Commitments

Demonstrate leadership by helping you deliver your sustainability commitments, including the SDGs in partnership with your suppliers.

We believe that blockchain can help make our world a better place.

We're dedicated to helping companies reduce the risk of conflict minerals, and damaging or fraudulent materials from entering the products that they make.

We give companies a powerful tool to help protect human rights, improve environmental performance and reduce safety risks in their supply chain.

We do this by using our innovative blockchain platform to securely document, track and trace materials, components and products from their source, all the way to the customer.

Our digital, distributed ledger gives companies a trusted, immutable record of all supply chain transactions, using the highest level of identity management in the industry.

We're nimble, so our blockchain platform can be tailored to meet each of our customers' individual needs.
